Product Description

The YP352833 is a high-integrated power amplifier MMIC intend for 5G wireless communication application. This power amplifier provides a typical gain of 28 dB and P1dB of 33dBm at 3.5GHz. It needs different matching circuit for different frequency range. Its typical quiescent bias condition is 5.0V at 400mA. The device is manufactured on an advanced InGaP/GaAs Heterojunction Bipolar Transistor (HBT) process. The YP352833 is assembled in a 16-pin, 4mm×4mm, QFN package, it is internally integrated with ESD protection unit.
